

Schaumburg Christian School - Preschool

32 Bethel Lane - Schaumburg, Illinois 60194

This is an example of one of the projects that we were involved in while serving on staff at Bethel Baptist Church. This massive remodeling project was completed with a short time schedule that finished on time and on budget. 50,000 square foot interior demolition and remodel of 80,000 square foot former public library building into one of the nation's largest preschools. This preschool contains an indoor play area, classrooms, and full service kitchen. A complete demolition of the entry area and retrofit, including the addition of a drive canopy and new entrance section was required to remove the outdated look the building once had.
